

# High performance and reliable **turbocharging**

PC / LCV / HCV  
APPLICATIONS  
**ENGINE  
EFFICIENCY**

Performance and reliability are the key qualities for a turbocharger. That is why our turbos are designed for excellence and to perfectly match the needs of the aftermarket.

Genuine Nissens Quality means that in the production of our turbos, we only use the industry's highest-rated materials. The inner components are manufactured to the correct tolerances and each turbo is precisely calibrated and comprehensively tested, which ensures high-quality, trouble-free, long-life turbocharging of the engine. **Boost your business with Nissens turbos.**
